

## Overview of the New Technical Library Website

**1 You are here** – This area shows you where you are in the website and provides links to each of the previous areas. This appears on many well-known websites such as Amazon.com and is sometimes called breadcrumbs.

**2 Search Our Site** – Here you can search all of the pages of the Technical Library website for a phrase or keyword. Click on the [help] link for additional tips for searching the website.

**3 Digital Library** – The Digital Library is comprised of resources and services you can access directly from your desktop. Here you will find journals, databases, and news to aid in your research efforts.

**4 Subject Guides** – Here you will find resources for specific topics including nanotechnology, propulsion, and microgravity. Look for the RSS icon   to view subject-specific news updated daily.

**5 Science and Technology News and NASA News** – Keep up to date on all industry and NASA related news in one spot. The Library has aggregated news from engineering, science and technology, and NASA sites updated hourly.

**6 NASA Galaxie Search** – NASA Galaxie is the Agency-wide catalog of Library materials. Enter a search term here and Galaxie will search all the NASA centers for matching books, journals, and documents.

**7 Visit the Library** – Here you will find information about the wealth of resources and services that are offered at the Main Library in building 60. By visiting us you will have access to print books and journals, over 800,000 documents, and the expertise of our dedicated staff.

**8 Library News** – This is your source for news and tips on Library products and events. Learn tips for searching, announcements of new product features and upcoming Library training and outreach events.

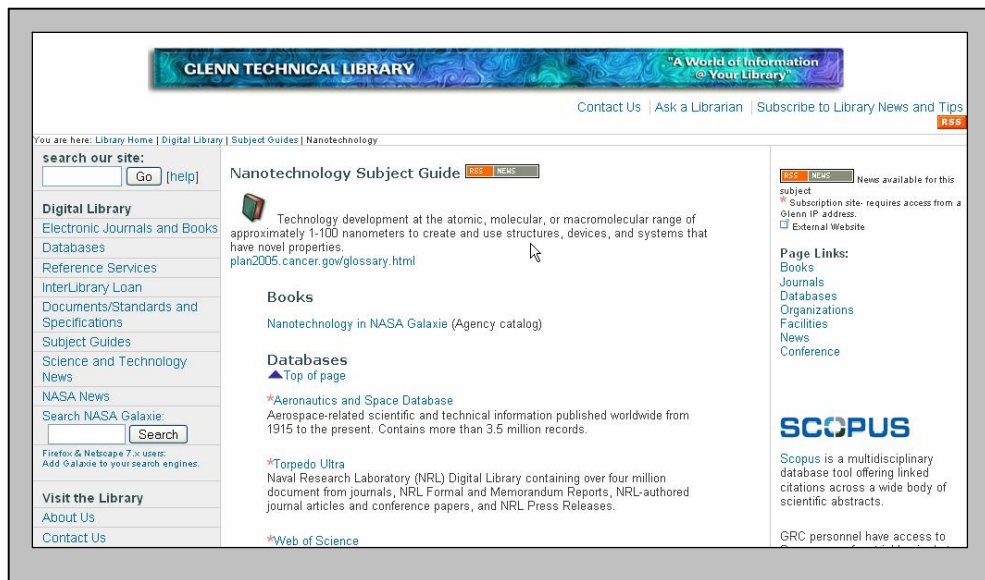

**9 NASA News** – Updated hourly, these news headlines are the top items found on Yahoo! News relating to Glenn Research Center. Click on the RSS icon   to view other NASA news sources.

**10 How do I...?** – Use this drop-down list to choose a frequently asked question about searching, research, and library services.

**11 Quick Links** – These links will take you directly to some of our most popular resources.

**12 Featured Resource** – This section will feature different Library resources each month. Currently we are featuring a free trial of the citation index Scopus.

**13 Subscribe to Library News and Tips** – Click here to learn how to subscribe to Library News through your RSS reader or RSS-aware browser.

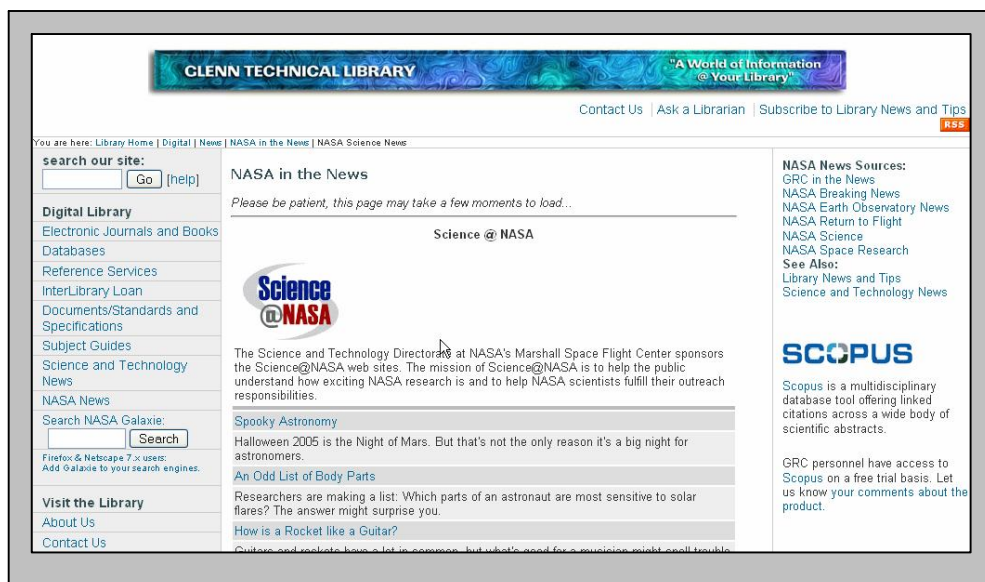

## Highlight on Subject Guides

Subject Guides combine subscription resources that Glenn purchases for its researchers along with valuable Internet resources – all geared toward a specific topic.

**Why use a Subject Guide?** The subject guides have been created from research conducted by the staff at the Library to find only the best resources available on the Web. If you search Google or Yahoo! you must sort through tons of not-so-relevant material to get that one great resource. The subject guides save you time by filtering out irrelevant material.

**My favorite website is not there!** The Subject Guides are designed to benefit the community at Glenn. We welcome suggestions for additional resources and requests for additional Subject Guide topics. Give the Library a call at 3-5762.

## Highlight on News Sources

Information is coming at you from every possible source: radio, tv, newspapers, and Internet – and everyday there is more. How do you keep up with what is important without drowning it what is not?

The Technical Library has brought together a variety of news sources into one spot. Directly from our webpage you can scan NASA news, engineering and sci/tech trends, and tips and resources to increase your productivity. Try it out today!

*and many more!*
